LAWN MOWERS

TAKE The J.P. "MINOR" for Instance

*THIS is our LATEST achievement
to aid the small lawn owner*

*YOU can mow YOUR small lawn
with absolute Comfort*

A sturdy and robustly-designed 9in. Machine, perfectly balanced and light in action. Its cutters are made with the usual J.P. precision from highest-grade tempered and hardened alloy steels. Skefco self-aligning ball bearings, in dust-proof housing, support the mechanism, and give that sweetness and efficiency of action combined with durability.

Steel gearing, with teeth accurately generated in Fellows gear shapers, all enclosed, has incorporated in it a noiseless free-wheel action far superior to anything yet attempted.

Genuine Lignum Vitae front rollers are fitted with vertical adjustment in parallel, secured by one Hand Wheel.

Scissors contact of the Ledger blade and rotary cutter is adjusted by one Hand Wheel simultaneously all along the length of the cut, and gives a razor blade efficiency. (See illustration below.)

NOW many appeals have been made by small lawn owners for a Lawn-mower of the famous J.P. Super quality for less initial outlay, so the J.P. Minor has been born.

It will mow your lawn all over, also narrow verges and edges, slopes and surrounds of bowling greens, and undulating golf greens.

It can be adjusted with ease to cut with razor-blade efficiency.

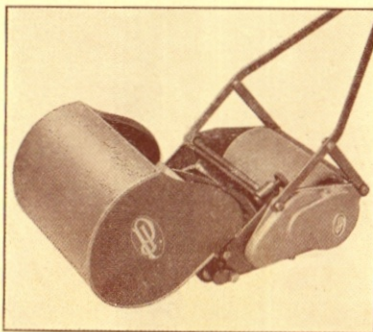

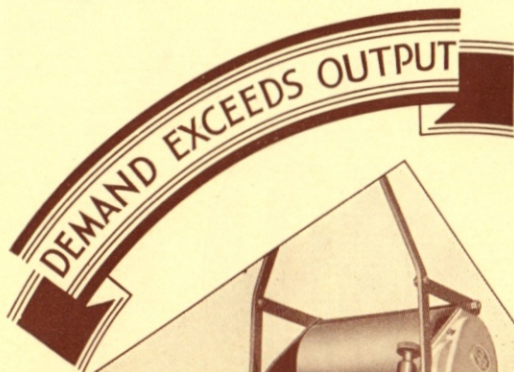

It will produce close velvety turf. It is light to handle and push.

It is robust, and built to last for many years.

It is sold at a price that anybody can pay.

It is a quality production, built to an ideal, irrespective of material costs.

It is built to give satisfaction.
