ROTOSCYTHE WINDSOR

A self-contained, rotary grass cutter with roller and large capacity grass box placed between the handles and well clear of the ground. The unique design of the cutting impellor ensures a clean pick up of all grass, bents, leaves, worm casts or debris leaving a clean roiled appearance unobtainable with any other mower. The machine is easy to manoeuvre round shrubs and borders. It can also be used to cut long grass in paddocks ; for rough ground, special large diameter wheels are available as an extra. The circular cutters can be readily adjusted when worn and no regrinding is necessary. They can also be replaced by moss pegs for the extraction of moss and creeping weeds, and the general improvement of lawn conditions.

THE COUNTRYMAN

Designed to efficiently control the growth of grass in paddocks, small fields and orchards, this machine is self-propelled and gives a 20" cut which quickly deals with all types of grasses. The machine lifts, cuts and throws the grass to one side in one operation, leaving a smooth almost lawnlike finish. The height of cut is easily adjustable and the cutting blades are quickly replaced when worn. The pneumatic tyred wheels are so designed as to ride over rough ground and have differential ratchets for easy manoeuvring.

THE COUNTY

This is the machine to make light work of heavy grasscutting in paddocks or orchards. The large rubber tyred wheels ride over rough ground and the complete machine is light and maneouvrable and extremely easy to push even in the toughest conditions. The cutter assembly, which is similar to that used on the Windsor is powered direct from the engine and will easily cut through the toughest grasses, weeds and thistles, leaving a very tidy finish.

FOUR - IN - HAND LAWN MOWERS

A de-luxe mower with many special features to make it one of the finest cylinder mowers available. Six precision ground blades make up the cutting cylinder which rotates at high speed to give a very fine cut. The simple controls in conjunction with the specially designed clutch give instant control when used to cut round shrubs or borders. The large capacity grass box makes mowing a pleasure, as large areas can be mown before emptying. The Villiers four-stroke engine gives plenty of power without being noisy, and the rewinding recoil starter gives effortless starting, even when cold.

Available to give cuts of 14" or 18" wide.

BLUEBIRD BATTERY ELECTRIC LAWN MOWERS

This battery operated lawn mower is very efficient and the power consumption is so low that 1,500 square yards of lawn can be cut on one battery charge. A "Safety First" key operated switch gives instant starting and yet it is completely foolproof when the key is not in position. The high speed cutting cylinder gives a fine cut and the mower is almost silent in use. Again the large capacity grass box aids mowing on large areas.

Available to give cuts of 14" or 18" wide.
